Feb 2023 - July 2025

Bayer

Pittsburgh, PA

Passlink (<https://dev.passlink.bayer.com>): Access Contrast Injector service features through Passlink mobile app

- Designed and implemented a local REST API in TypeScript to enhance the functionality of an existing C# architecture.
- Updated C# based medical device software to integrate with the API, enabling expanded functionality.
- Developed, modified, and integrated UI controls within existing C# WPF MVC applications to enhance functionality and usability.
- Developed comprehensive test suites using Jest to ensure reliability and consistency in API functionality.
- Authored and maintained technical documentation in compliance with Bayer's established processes.
- Adhered to Agile development methodologies, utilizing tools such as Git, Artifactory, and Jira for version control, artifact management, and project tracking.
- Collaborated with stakeholders to enhance and refine customer-facing designs for improved user experience.

## Software Projects
